

Husqvarna K 970

Robust, reliable, light and powerful - the K 970 power cutter is ready to perform when you are. The ultimate choice when you need an all-around cutter performing in the toughest conditions, withstanding climate and fuel variations. Suitable for flatwork when used with the corresponding KV 970 cutting cart, which enables you to fully concentrate on the cutting job.

STURDY AND RELIABLE

Less sensitive to outdoor conditions and fuel variations, thanks to the cylinder design and muffler with integrated heat deflector.

EASY TO START

The unique design of the carburetor, cylinder and digital ignition system, together with air purge and decompression valve, ensure an easy start.

LONG SERVICE INTERVALS

A strong Poly-V belt combined with our maintenance-free DuraStarter™ and efficient filter-system Active Air Filtration™ ensure long service intervals.

LESS SLURRY AND LOW WATER CONSUMPTION

Excellent dust control with our wet cutting kit. A progressive water valve for exact adjustment of the water volume to efficiently bind the dust and reduce slurry.

Features Husqvarna K 970

- Light and powerful
- Easy to change bladeguard position
- Fits multiple blade bushings
- The only time the filter needs to be checked and changed is if you experience lack of power.
- High power with less fuel
- Reduced wear thanks to the drive belt with fully sealed transmission, which keeps out the cutting dust.
- Blade retarder
- Patented, dust sealed starter unit with a sealed return spring and pulley bearing. DuraStarter™ also includes a starter cord with greatly increased durability. This makes the starter virtually maintenance free, further enhancing the reliability of our cutters.
- Our X-Torq® engine produces less emissions, has lower fuel consumption and results in more power.
- The cutting arm is reversible which lets you cut closer to walls or the ground. The drive belt has a fully sealed transmission. This keeps out cutting dust etc, reducing wear.
- Our two-step filtration system with centrifugal cleaning and a single paper filter increases product life and extends service intervals.
- Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. To provide the user a comfortable operating position and to reduce strain, the distance between the handles is large. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.
- Our virtually maintenance free starter, thanks to the dust-sealed starter and the durable starter cord.
- EasyStart ensures easier starting by reducing the compression in the cylinder.
- Provides better transmission of power, less frequent re-tensioning and extended service intervals.
- The drive belt with fully sealed transmission keeps out cutting dust for reduced wear and allows close cutting to walls and floor.
- Our built-in automatic filter compensation maintains high power during the air filter life time.
- Less slurry and low water consumption thanks to the progressive water valve, this adjusts the water volume to the exact amount needed.

TECHNICAL DATA

Engine	Air-cooled 2 stroke engine
Cylinder displacement	93,6 cm ³
Power output	4,8kW
Fuel tank volume	1 lit
Idling speed	2700 rpm
Vibrations front handle	3,9/3,4 m/s ²
Vibrations rear handle	4,2/4,8 m/s ²
Sound pressure level at operators ear	104 dB(A)
Sound power level, guaranteed (LWA)	115 dB(A)
Blade diameter	350/400 mm
Max cutting depth	125/145 mm
Combined bushing diameter	20/25,4 mm
Weight (excl. cutting equipment)	10,9/11,9 kg
